DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,7, 10 & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by JP Patent Application 2003-121021. The JP patent application discloses a double effect absorption refrigerant machine comprising: an outside heat source (5), a passage through which the outside heat source fluid heats and concentrates an absorption solution with the high temperature regenerator (GH), a dilution solution from an absorber (A) is introduced into a low temperature heat exchanger (XL) and a branch point (B1) is introduced into the high temperature regenerator and the ~~the~~ remaining dilute solution from the branch point (B1) is introduced into a low temperature regenerator (GL) and whereby the low temperature heat exchanger (XL) may be divided into two independent heat exchangers and the remaining dilute solution not branched in the low temperature heat exchanger (XL) can adopt optional flow of parallel, series or reverse flow. Furthermore as stated in claim 10, an exhaust heat recovery heat exchanger (XA) is installed.

Allowable Subject Matter

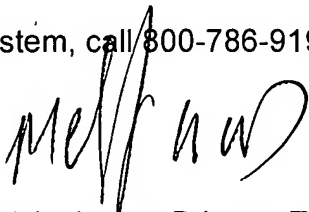

Claims 2,3,5,6,8,9,11,12 & 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
